

27 January 1965

Dear Russ:

Attached is material requested by you for the computer reduction of microdensitometer traced edges:

1. A listing of the source deck SWRDR (FORTRAN IV for I.B.M. 7044 computer),
2. a listing of a test data deck, and
3. the computer output for the test data.

Separately, we are sending the punched card source deck SWRDR and the cards for the test data. This completes the transfer of written material on the computer program SWRDR in its present form.

If there are further questions on the operation of this program, please feel free to call on us.
